

System Registration system

i. Functional Requirements

- a. The students shall be able to register for classes only when they complete the pre-requisites.
- b. The administrators should have the ability to enforce the class size.
- c. The administrators should have the ability to register students to classes even when the class is full.
- d. The system shall allow the student to see their current GPA, completed courses, all past semesters, and each class and grade.

ii. Non-functional Requirements

- a. Students, administrators, faculty, and staff shall all have unique usernames and passwords.
- b. The system shall only have 100 students from each college registering for classes at one specific time frame.
- c. The system should be available a month before the semester starts from 12:00 pm to 7:00 pm.
- d. The system should be backed up after every registration period in a separate data file.
- e. The registration website should have clear language that is easily understood for students to register.
- f. The system shall be able to be used by students with no prior training.

Online Store

i. Functional Requirements

- a. Customers shall have a basket for what items they want to buy and have the ability to review it at any time.
- b. Customers shall be able to pay through the store immediately.

ii. Non-functional Requirements

- a. To protect the user's information from malicious programs, encryption should be downloaded and readily available to check every action and regularly updated.
- b. The online store's user interface shall have a maximum response time of two seconds.
- c. The store should be available 24 hours a day, 7 days a week with a capacity of 1000 users simultaneously.
- d. The failure rate shall not exceed once semi-annually.
